“I get the support I need with PROLASTIN DIRECT.

—Heather, actual patient since 2018

Welcome to PROLASTIN DIRECT®

My schedule, my life, my alpha-1 journey, all supported by a team dedicated to the care I need.

Being diagnosed with alpha<sub>1</sub>-antitrypsin deficiency (AL-fa / one / an-tee-TRIP-sin / de-FISH-an-see), or alpha-1, can be overwhelming for anyone. People who have been prescribed PROLASTIN®-C LIQUID (alpha<sub>1</sub>-proteinase inhibitor [human]) are automatically enrolled in the PROLASTIN DIRECT program, which provides a team dedicated to each person’s alpha-1 care.

PROLASTIN-C LIQUID is an alpha<sub>1</sub>-proteinase inhibitor (human) (alpha<sub>1</sub>-PI) indicated for chronic augmentation and maintenance therapy in adults with clinical evidence of emphysema due to severe hereditary deficiency of alpha<sub>1</sub>-PI (alpha<sub>1</sub>-antitrypsin deficiency).

Please see Important Safety Information about PROLASTIN-C LIQUID on page 9, and refer to enclosed full Prescribing Information for complete prescribing details.

PROLASTIN DIRECT manages the important details:

-  Insurance verification and help completing your prescription processing
-  Pharmacy services, supplies, and delivery to your home or infusion center
-  24/7 access to expert nurses and pharmacists at **1-833-PHONEA1 (746-6321)**

PROLASTIN DIRECT automatically connects you with AlphaNet®, a not-for-profit organization dedicated to serving people with alpha-1.

Heather and Toya,  
actual patients

Alpha<sub>1</sub>-antitrypsin deficiency, or alpha-1, is a rare genetic disease often called “genetic COPD” because it can be passed down through families. If you have alpha-1, your body does not make enough alpha<sub>1</sub> antitrypsin, a protein that protects your lungs from inflammation that can reduce lung function.

## PROLASTIN<sup>®</sup>-C LIQUID: The #1 augmentation therapy trusted by alpha-1 patients and their doctors

PROLASTIN-C LIQUID is the #1 prescribed augmentation therapy, trusted by patients with alpha-1 and their doctors for more than 35 years. When given as prescribed by your doctor, PROLASTIN-C LIQUID has been proven to effectively raise the alpha<sub>1</sub> antitrypsin levels in patients with alpha-1.

### PROLASTIN-C LIQUID:

- Offers the convenience of receiving your infusion at home or an infusion center
- PROLASTIN-C LIQUID involves a weekly infusion that takes approximately 15 minutes when given at the recommended rate of 0.08 mL/kg/min. Some additional time may be required for setup and post-infusion procedures.

The overall frequency of adverse events was similar between PROLASTIN-C LIQUID and lyophilized PROLASTIN-C, and no adverse events led to treatment withdrawal. The most common adverse reactions that occurred in >5% of subjects in clinical trials for PROLASTIN-C LIQUID were diarrhea and fatigue, each of which occurred in 2 subjects (6%).

## Benefits of the PROLASTIN DIRECT<sup>®</sup> program

### Support every step of the way.

People with alpha-1 who are prescribed PROLASTIN<sup>®</sup>-C LIQUID are automatically enrolled in PROLASTIN DIRECT.

From diagnosis to starting and staying on treatment, you'll have help at every step with PROLASTIN DIRECT. This comprehensive patient program provides personalized support to people taking PROLASTIN-C LIQUID. The program is managed by Accredo, the specialty pharmacy that fills PROLASTIN-C LIQUID prescriptions.

### Seamless support makes it all work together.

Navigating your insurance, shipping your medicine, scheduling your infusion, and, often, administering your infusion are all handled by the PROLASTIN DIRECT program

Whether you choose to receive PROLASTIN-C LIQUID infusions at home or at an infusion center, PROLASTIN DIRECT will help get your medication shipments to the right location

Questions? Help is always available with 24/7 access to experts at **1-833-PHONEA1 (746-6321)**

Please see Important Safety Information about PROLASTIN-C LIQUID on page 9, and refer to enclosed full Prescribing Information for complete prescribing details.

## Getting started with PROLASTIN®-C LIQUID

1

Your doctor sends your prescription to the PROLASTIN DIRECT® support program, which helps you with navigating insurance coverage, choosing where to receive infusions, and more.

2

PROLASTIN DIRECT will call you within 48 hours after receiving your prescription. A representative will verify your insurance, answer any questions you may have, and help complete your prescription processing. It is very important to answer this phone call to get your treatment started. The caller ID may show as “unknown” or “NA” or even “Accredo,” the name of the specialty pharmacy.

3

If you choose infusions at home, a nurse from PROLASTIN DIRECT will call to review your insurance coverage and benefits. They’ll also explain how the program, treatment, and infusions work, and how your medication will be sent. If you choose infusions at an infusion center, the center will call to explain their process.

15

### A treatment that works with your schedule.

The PROLASTIN DIRECT support program works directly with your insurance company to secure and deliver to your PROLASTIN-C LIQUID infusion location. Your PROLASTIN-C LIQUID can be sent directly to your home prior to your appointment with your infusion nurse. If you receive your infusions at an infusion center, your PROLASTIN-C LIQUID can be waiting for you when you get there. You can even receive your infusions while traveling.

“

When I was first diagnosed with alpha-1, I was extremely overwhelmed. But when I connected with the PROLASTIN DIRECT program and AlphaNet, it was such a blessing for me.

—Toya, actual patient since 2016

## My PROLASTIN DIRECT® means support that puts me first.

### A team of experts, always there for me, from the very beginning.

With PROLASTIN-C LIQUID, you’re never alone. You’ll have access to a full support team, including your doctor or alpha-1 specialist, your PROLASTIN DIRECT representative, and your AlphaNet coordinator.

During your first PROLASTIN DIRECT program call, you can be connected to AlphaNet, a not-for-profit organization of *Alphas Serving Alphas*®. Patients with alpha-1 can get the support they need from an AlphaNet Coordinator, a trained expert who is also living with alpha-1. AlphaNet Coordinators provide ongoing support through monthly follow-up calls. Learn more at [alphanet.org](http://alphanet.org) or call **1-800-577-2638**.

PROLASTIN DIRECT also offers 24/7 access to nurses and pharmacists who are experts in alpha-1 care. Your care team will be available via phone calls, video chats, emails, and text messages. They can answer any questions you have about treatment at **1-833-PHONEA1 (746-6321)**.

Please see Important Safety Information about PROLASTIN-C LIQUID on page 9, and refer to enclosed full Prescribing Information for complete prescribing details.

## The PROLASTIN DIRECT<sup>®</sup> assist program may help with your copay.

**The PROLASTIN DIRECT Assist program helps qualified patients who are prescribed PROLASTIN<sup>®</sup>-C LIQUID start and stay on therapy.**

Patients taking PROLASTIN-C LIQUID who have commercial insurance may qualify for a \$0 copay through the PROLASTIN DIRECT Assist program. The program may also help with the cost of the deductible, and can provide up to \$10,000 per year every year in financial assistance for eligible patients. Eligibility criteria and restrictions apply.

Please see Important Safety Information about PROLASTIN-C LIQUID on page 9, and refer to enclosed full Prescribing Information for complete prescribing details.

“

**I receive my infusions at home.  
It gives me time to relax before  
I start the day.**

—Jesus, actual patient since 2016

## Important Safety Information

PROLASTIN<sup>®</sup>-C LIQUID is an alpha<sub>1</sub>-proteinase inhibitor (human) (alpha<sub>1</sub>-PI) indicated for chronic augmentation and maintenance therapy in adults with clinical evidence of emphysema due to severe hereditary deficiency of alpha<sub>1</sub>-PI (alpha<sub>1</sub>-antitrypsin deficiency).

### Limitations of Use

- The effect of augmentation therapy with any alpha<sub>1</sub>-PI, including PROLASTIN-C LIQUID, on pulmonary exacerbations and on the progression of emphysema in alpha<sub>1</sub>-PI deficiency has not been conclusively demonstrated in randomized, controlled clinical trials
- Clinical data demonstrating the long-term effects of chronic augmentation or maintenance therapy with PROLASTIN-C LIQUID are not available
- PROLASTIN-C LIQUID is not indicated as therapy for lung disease in patients in whom severe alpha<sub>1</sub>-PI deficiency has not been established

PROLASTIN-C LIQUID is contraindicated in immunoglobulin A (IgA)-deficient patients with antibodies against IgA or patients with a history of anaphylaxis or other severe systemic reaction to alpha<sub>1</sub>-PI products.

Hypersensitivity reactions, including anaphylaxis, may occur. Monitor vital signs and observe the patient carefully throughout the infusion. If hypersensitivity symptoms occur, promptly stop PROLASTIN-C LIQUID infusion and begin appropriate therapy.

Because PROLASTIN-C LIQUID is made from human plasma, it may carry a risk of transmitting infectious agents, eg, viruses, the variant Creutzfeldt-Jakob disease (vCJD) agent, and, theoretically, the Creutzfeldt-Jakob disease (CJD) agent. This also applies to unknown or emerging viruses and other pathogens.

The most common adverse reactions during PROLASTIN-C LIQUID clinical trials in >5% of subjects were diarrhea and fatigue, each of which occurred in 2 subjects (6%).

**Please see accompanying full Prescribing Information for PROLASTIN-C LIQUID.**

**You are encouraged to report negative side effects of prescription drugs to the FDA.  
Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch) or call 1-800-FDA-1088.**

## Understanding your support

The PROLASTIN DIRECT® program was developed by Grifols and involves a close partnership with alpha-1–expert organizations that work exclusively with patients with alpha-1: Accredo and AlphaNet®.

**Grifols** [www.grifolsusa.com](http://www.grifolsusa.com)

Grifols manufactures PROLASTIN®-C LIQUID (alpha<sub>1</sub>-proteinase inhibitor [human]) and developed the PROLASTIN DIRECT program. Grifols is a global healthcare company that has worked to improve the health and well-being of people around the world for more than 100 years. Grifols produces essential plasma medicines used to treat rare, chronic, and, at times, life-threatening conditions like alpha-1.

**PROLASTIN DIRECT/Accredo** Toll-free: (833) PHONEA1 (746-6321)

When you are prescribed PROLASTIN-C LIQUID, your doctor sends your prescription to Accredo, the specialty pharmacy that fills PROLASTIN-C LIQUID prescriptions and manages the PROLASTIN DIRECT program. After receiving your prescription, Accredo will call you to verify your insurance, answer any questions you may have, and complete your prescription processing. Accredo is a patient-centered service organization composed of pharmacy and insurance specialists. Their PROLASTIN DIRECT program team members are 100% dedicated to patients with alpha-1 receiving PROLASTIN-C LIQUID therapy.

**AlphaNet** [www.alphanet.org](http://www.alphanet.org) Toll-free: (800) 577-2638

During your first PROLASTIN DIRECT program call, you will be automatically connected to AlphaNet so you can speak with an actual alpha-1 patient who knows what you are going through. AlphaNet is a not-for-profit organization of Alphas Serving Alphas®, through which patients with alpha-1 can get the support they need from someone who is also living with alpha-1. These expert AlphaNet Coordinators provide ongoing support through monthly follow-up calls.
