Welcome to PROLASTIN DIRECT®

My schedule, my life, my alpha-1 journey, all supported by a team dedicated to the care I need.

Being diagnosed with alpha$_1$-antitrypsin deficiency (AL-fa / one / an-tee-TRIP-sin / de-FISH-an-see), or alpha-1, can be overwhelming for anyone. People who have been prescribed PROLASTIN®-C LIQUID (alpha$_1$-proteinase inhibitor [human]) are automatically offered enrollment in the PROLASTIN DIRECT program, which provides a team dedicated to each person’s alpha-1 care.

PROLASTIN DIRECT®
Your partner in alpha-1

PROLASTIN-C LIQUID is a medicine containing alpha$_1$-proteinase inhibitor (alpha$_1$-PI). It is used to treat adults with lung disease (emphysema) because of severe alpha$_1$-antitrypsin (AAT) deficiency. It is not known how alpha$_1$-PI products impact worsening lung function or emphysema. Long-term effects of PROLASTIN-C LIQUID have not been studied. PROLASTIN-C LIQUID is not meant to be used as a therapy for lung disease other than severe AAT deficiency.

PROLASTIN DIRECT manages the important details:

- Insurance verification and help completing your prescription processing
- Pharmacy services, supplies, and delivery to your home or infusion center
- Access to expert nurses and pharmacists at **1-833-PHONEA1 (746-6321)**

PROLASTIN DIRECT automatically offers you connection with AlphaNet®, a not-for-profit organization dedicated to serving people with alpha-1.

Effects of PROLASTIN-C LIQUID on worsening lung function and emphysema progression have not been proven in clinical trials. Clinical data on the long-term effects of augmentation therapy and maintenance therapy with PROLASTIN-C LIQUID are not available. PROLASTIN-C LIQUID is not meant to be used as a therapy for lung disease where severe alpha$_1$-antitrypsin deficiency has not been established.

Heather and Toya, actual patients

READY-TO-INFUSE
PROLASTIN® C LIQUID alpha$_1$-proteinase inhibitor (human)

Alpha$_1$-antitrypsin deficiency, or alpha-1, is a rare genetic disease often called “genetic COPD” because it can be passed down through families. If you have alpha-1, your body does not make enough alpha$_1$ antitrypsin, a protein that protects your lungs from inflammation that can reduce lung function.

PROLASTIN®-C LIQUID: The #1 prescribed augmentation therapy trusted by alpha-1 patients and their doctors

PROLASTIN-C LIQUID is the #1 prescribed augmentation therapy, trusted by patients with alpha-1 and their doctors for more than 35 years. When given as prescribed by your doctor, PROLASTIN-C LIQUID has been proven to effectively and safely raise the alpha$_1$ antitrypsin levels in patients with alpha-1.[1]

PROLASTIN-C LIQUID:

- Convenience that works for you. Weekly infusions with PROLASTIN-C LIQUID may be administered by a healthcare professional at home, at an infusion center, or even when you are traveling.
- PROLASTIN-C LIQUID involves a weekly infusion that takes approximately 15 minutes when given at the recommended rate of 0.08 mL/kg/min. Some additional time may be required for setup and post-infusion procedures.

Please see Important Safety Information about PROLASTIN-C LIQUID on page 9, and refer to enclosed full Prescribing Information for complete prescribing details.

Benefits of the PROLASTIN DIRECT® program

There’s help at every step.

People with alpha-1 who are prescribed PROLASTIN®-C LIQUID are automatically offered enrollment in PROLASTIN DIRECT.

Our experts are with you to help secure insurance coverage and coordinate your infusions and beyond, so you can count on our PROLASTIN DIRECT program for unmatched support every step of the way. The program works with a specialty pharmacy that fills prescriptions for PROLASTIN-C LIQUID.

If not enrolled in PROLASTIN DIRECT, you can reach out to AlphaNet® directly to be connected with a Coordinator. Visit www.alphanet.org/about/coordinators for more details.

Seamless support makes it all work together.

Navigating your insurance, shipping your medicine, scheduling your infusion, and, often, administering your infusion are all handled by the PROLASTIN DIRECT program.

Whether you receive PROLASTIN-C LIQUID infusions at home or at an infusion center, PROLASTIN DIRECT will help get your medication shipments to the right location.

Questions? Help is always available with access to experts at **1-833-PHONEA1 (746-6321)**, or reach out to your infusion provider directly.

The overall frequency of adverse events was similar between PROLASTIN-C LIQUID and lyophilized PROLASTIN-C, and no adverse events led to treatment withdrawal. The most common adverse reactions that occurred in >5% of subjects in clinical trials for PROLASTIN-C LIQUID were diarrhea and fatigue, each of which occurred in 2 subjects (6%).

PROLASTIN DIRECT®
Your partner in alpha-1

Getting started with PROLASTIN®-C LIQUID

1

Your doctor sends your prescription to the PROLASTIN DIRECT® program, which helps you with determining where to receive infusions, navigating insurance coverage, and more.

2

PROLASTIN DIRECT will call you within 2 business days after receiving your prescription. A representative will verify your insurance, answer any questions you may have, and help complete your prescription processing. It is very important to answer this phone call to get your treatment started. The caller ID may show as "unknown" or "NA" or even "Accredo," the name of the specialty pharmacy.

3

For infusions at home, a nurse from PROLASTIN DIRECT will call to review your insurance coverage and benefits. They'll also explain how the program, treatment, and infusions work, and how your medication will be sent. For infusions at an infusion center, the center will call to explain their process. PROLASTIN-C LIQUID is covered by 90%+ of health plans nationwide.

A program that works with your schedule.

The PROLASTIN DIRECT support program works directly with your insurance company to secure and deliver to your PROLASTIN-C LIQUID infusion location. Your PROLASTIN-C LIQUID can be sent directly to your home prior to your appointment with your infusion nurse. If you receive your infusions at an infusion center, your PROLASTIN-C LIQUID can be waiting for you when you get there. You can even receive your infusions while traveling.

Please see Important Safety Information about PROLASTIN-C LIQUID on page 9, and refer to enclosed full Prescribing Information for complete prescribing details.

READY-TO-INFUSE
PROLASTIN® C LIQUID alpha$_1$-proteinase inhibitor (human)

"When I was first diagnosed with alpha-1, I was extremely overwhelmed. But when I connected with the PROLASTIN DIRECT program and AlphaNet, it was such a blessing for me.

—Toya, actual patient since 2016

My PROLASTIN DIRECT® means support that puts me first.

A team of experts, always there for me, from the very beginning.

With PROLASTIN DIRECT, you're never alone. You'll have access to a full support team, including your doctor or alpha-1 specialist, your PROLASTIN DIRECT representative, and your AlphaNet® coordinator.

When you first enroll in the PROLASTIN DIRECT program, you can be connected to AlphaNet, a not-for-profit organization of Alphas Serving Alphas®. Patients with alpha-1 can get the support they need from an AlphaNet Coordinator, a trained expert who is also living with alpha-1. AlphaNet Coordinators provide ongoing support through monthly follow-up calls. Learn more at **alphanet.org** or call **1-800-577-2638**.

PROLASTIN DIRECT also offers access to nurses and pharmacists who are experts in alpha-1 care. They can answer any questions you have about treatment at **1-833-PHONEA1 (746-6321)**. You can also reach out to your infusion provider directly with any questions.

PROLASTIN® DIRECT
Your partner in alpha-1

The PROLASTIN DIRECT® Assist program may help with your copay.

The PROLASTIN DIRECT Assist program helps qualified patients who are prescribed PROLASTIN®-C LIQUID start and stay on therapy.

$0

Patients taking PROLASTIN-C LIQUID who have commercial insurance may qualify for a $0 copay through the PROLASTIN DIRECT Assist program.* The program may also help with the cost of the deductible, and can provide up to $10,000 per year, every year in financial assistance for eligible patients. Eligibility criteria and restrictions apply.

Grifols Patient Access Liaisons (PALs) are reimbursement and coverage specialists who can support patients by helping them understand options and provide general education about insurance coverage, reimbursement, and access matters related to PROLASTIN-C LIQUID.

Scan this QR code or go to www.prolastin.com/en/insurance-hub for more information.

*Patient may not be enrolled in Medicare, Medigap, Medicaid, VA, DOD, Tricare, or any other state or federally funded program.

Please see Important Safety Information about PROLASTIN-C LIQUID on page 9, and refer to enclosed full Prescribing Information for complete prescribing details.

What is PROLASTIN-C LIQUID?

PROLASTIN-C LIQUID is a medicine containing alpha$_1$-proteinase inhibitor (alpha$_1$-PI). It is used to treat adults with lung disease (emphysema) because of severe alpha$_1$-antitrypsin (AAT) deficiency.

- It is not known how alpha$_1$-PI products impact worsening lung function or emphysema
- Long-term effects of PROLASTIN-C LIQUID have not been studied
- PROLASTIN-C LIQUID is not meant to be used as a therapy for lung disease other than severe AAT deficiency

IMPORTANT SAFETY INFORMATION

Who should not use PROLASTIN-C LIQUID?

Do not use PROLASTIN-C LIQUID if you:

- Have IgA deficiency with antibodies to IgA
- Have a history of severe allergic reactions to medicines containing alpha$_1$-PI

What is the most important information I need to know about PROLASTIN-C LIQUID?

- PROLASTIN-C LIQUID can cause severe allergic reactions. Tell your doctor right away or go to the emergency room if you have:
  - o Hives
  - o Dizziness
  - o Trouble breathing
  - o Faintness
  - o Wheezing
- PROLASTIN-C LIQUID is made from human plasma (liquid portion of blood). Though the manufacturing process contains steps to remove viruses, PROLASTIN-C LIQUID may still carry a risk of transmitting infectious agents, such as viruses

What are the most common side effects of PROLASTIN-C LIQUID?

- Diarrhea
- Feeling tired or weak (fatigue)

These are not all the possible side effects. Tell your doctor about any side effect that bothers you or does not go away.

What should I tell my doctor before using PROLASTIN-C LIQUID?

- Tell your doctor if you have IgA deficiency
- Tell your doctor if you have ever had a severe allergic reaction to medicines containing alpha$_1$-PI

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.

For additional safety information, please see full Prescribing Information and discuss with your doctor.

Understanding your support

The PROLASTIN DIRECT® program was developed by Grifols and involves a close partnership with alpha-1–expert organizations that work exclusively with patients with alpha-1.

Grifols www.grifolsusa.com

Grifols manufactures PROLASTIN®-C LIQUID (alpha$_1$-proteinase inhibitor [human]) and developed the PROLASTIN DIRECT program. Grifols is a global healthcare company that has worked to improve the health and well-being of people around the world for more than 100 years. Grifols produces essential plasma medicines used to treat rare, chronic, and, at times, life-threatening conditions like alpha-1.

PROLASTIN DIRECT Toll-free: (833) PHONEA1 (746-6321)

When you are prescribed PROLASTIN-C LIQUID, your doctor sends your prescription a specialty pharmacy that fills PROLASTIN-C LIQUID prescriptions and manages the PROLASTIN DIRECT program. After receiving your prescription, the specialty pharmacy will call you to verify your insurance, answer any questions you may have, and complete your prescription processing. Their PROLASTIN DIRECT program team members are 100% dedicated to patients with alpha-1 receiving PROLASTIN-C LIQUID therapy.

AlphaNet® www.alphanet.org Toll-free: (800) 577-2638

During your first PROLASTIN DIRECT program call, you will be automatically connected to AlphaNet so you can speak with an actual alpha-1 patient who knows what you are going through. AlphaNet is a not-for-profit organization of Alphas Serving Alphas®, through which patients with alpha-1 can get the support they need from someone who is also living with alpha-1. These expert AlphaNet Coordinators provide ongoing support through monthly follow-up calls.
